PHASE I

Immerse yourself in the heart of Seedness in two of our unique pools surrounded by nature and extending towards our jungle. Visual continuity links vegetation from terrace to terrace. In the resting space, the headboard composed of two different woods and a polished wall serve as the frame for the center, through the unique perspective of Benjamin Soto, a photographer tasked with bringing us the memory of eternal mountains from the jungle. Waking up with them crowned and turning around to look at your terrace and the connection with the green surrounding Pride.

Open the large sliding windows and turn the entire space into a place for the wind to flow and observe the composition of color and materials. Floors on the terraces extracted from the same terrain, woods in two tones, dyed fabrics, and furniture that harmonizes and always gives the sensation of continuity, making boundaries disappear.
