PHASE I

A space created to live in continuity. From green to green, jungle to jungle, Relief releases from terrace to terrace and allows multiple atmospheres in a single space. The concrete along one of its walls gradually blends with the integration of wood that gradually closes until reaching the bed. A faint light between wood and concrete generates the first luminous atmosphere, and the accent on the tidal piece, a work by Gustavo Argüello, commissioned for this space, contacts the sea.

Relief. Feel the calm of the jungle from your pool on the terrace that lives towards the heart of the jungle. Contemplate, read, breathe from the other terrace that, just a step away from awakening, from the bed is the first contact with the outside. Enjoy the coziness of the wooden walls and the smooth and comfortable integration of interior design with furniture and finishes made to find no limits, light, interior design, art in continuity, and made for you.
